Article body

How to configure VPN for Apple Devices

For an iPhone or iPad running iOS?

1. *Select* **Settings > General > VPN**.=
2. *Click* **Add VPN Configuration** and *enter* the **following information**:
3. 1. Select **L2TP**.
   2. Enter **Servicenow VPN** in the **Description** field.
   3. Enter **vpn-nu.vpn.servicenow.edu** in the **Server** field.
   4. Enter your **NetID** in the **Account** field.
   5. Enter your **NetID password** in the **Password** field.
   6. Enter **servicenow** (case sensitive) in the **Secret** field.
   7. Select **Save**.
4. To connect to Servicenow VPN, **VPN** should be *turned* **On**. Once you are successfully connected to Servicenow VPN, your screen will look like the following

For Mac OS X Mavericks (10.9), Mountain Lion (10.8) or Lion (10.7)

1. *Open* **Apple > System Preferences**.
2. *Select* the **Network** icon in the **System Preferences** window.
3. *Click the* ***+ button*** *at the bottom left of the screen to add a new connection. (Note: You may need to click the LOCK icon to enable editing of Network Settings.)*
4. - *Select* **Interface**: VPN
   - ***Select* VPN Type**: L2TP over IPSec
   - ***Enter* Service Name**: Servicenow VPN
